SERIES 'Y' Filter Chambers are constructed of rubber or Hypalon® lined carbon steel, providing non-metallic solution contact. A75 PSI ASME code design, non-stamped, is standard with 150 PSI code design optional. ASME code stamp for either pressure rating is also optional.

The lining material serves as full cover, separator plate and flange gasket. Standard internals are PVC. External steel surfaces are painted with two part epoxy gray enamel and external fasteners are stainless steel.

The chamber is provided with a removable internal cage assembly for ease of cartridge service and chamber cleanout. Standard chambers are for double open end (DOE) cartridges with 222 'O-ring' SOE cartridge seats optional. Models with "B" designation provide maximum spacing between cartridges.
